WD-Activity-Based-Learning

Case-Study-1

1. Introduction

Campus Hub is an Engineering Student Dashboard website developed using HTML and CSS. The main purpose of this website is to help engineering students access and manage their academic information in one place.

This website provides important student details such as attendance percentage, semester GPA, subject information, examination schedules, semester results, and latest announcements. It has a simple, attractive, and user-friendly design that helps students easily navigate through different sections.

The website is designed using HTML for creating the structure and CSS for styling and layout.

2. Explanation of the Website

The CampusHub website contains the following sections:

1. Sidebar Navigation:

- Displays the CampusHub logo and student menu.
- Contains links to Dashboard, My Subjects, Attendance, Semester Results, Exam Schedule, and Announcements.
- Helps students navigate between different sections.

2. Student Dashboard:

- Displays a welcome message.
- Shows the student profile and academic details.
- Includes student name, course, roll number, and academic year.

3. Academic Statistics:

- Displays overall attendance percentage.
- Shows semester GPA.
- Displays the total number of subjects.

- Shows the number of upcoming examinations.

4. Attendance Overview:

- Displays subject-wise attendance percentages.
- Uses progress bars to represent attendance visually.
- Helps students understand their attendance status.

5. Subject Information:

- Displays subject names, subject codes, and faculty details in a table.

6. Semester Results:

- Displays subject-wise marks and grades.
- Helps students view their academic performance.

7. Examination Schedule:

- Displays examination dates and timings.
- Helps students plan their examination preparation.

8. Latest Announcements:

- Displays important academic updates.
- Includes assignment reminders, examination updates, and coding practice information.

9. Footer:

- Displays the copyright information and website name.

6. Conclusion

The CampusHub – Engineering Student Dashboard project was successfully developed using HTML and CSS. This project helps students view their academic information in an organized and user-friendly manner.

Through this project, I learned how to create webpage structures using HTML and improve website appearance using CSS. I also gained practical knowledge of Flexbox, Grid, tables, progress bars, and responsive web design.

This project improved my frontend web development skills and provided a foundation for developing more advanced student management websites in the future.

Case-Study-2

1. Introduction

TECHNOVIBE 2026 is a College Fest Website developed using HTML and CSS. The main purpose of this website is to provide complete information about a college festival in one place.

The website provides details about various technical events, cultural events, workshops, event schedules, coordinators, festival rules, and registration. It helps students easily explore different activities and participate in the college fest.

The website is designed with an attractive user interface, colourful sections, navigation links, event cards, and a registration form. HTML is used to create the structure, while CSS is used to design and style the webpage.

2. Explanation of the Website

The TECHNOVIBE website contains the following sections:

1. Header Section:

- Displays the title TECHNOVIBE 2026.
- Shows the tagline "Innovation • Creativity • Celebration".
- Provides the identity of the college festival.

2. Navigation Bar:

- Contains links to Events, Schedule, Coordinators, Rules, and Register.
- Helps users navigate easily between different sections.

3. Hero Section:

- Displays the welcome message "Unleash Your Talent!".
- Contains a Register Now button.
- Attracts visitors to participate in the festival.

4. Events Section:

- Displays different categories of events.
- Includes Technical Events, Cultural Events, Workshops, and Fun Zone.
- Uses separate cards to display event information.

5. Event Schedule:

- Displays the event timings, event names, and venues in a table.
- Helps students understand the festival schedule.

6. Event Coordinators:

- Displays the names of event coordinators.
- Provides information about their responsibilities and contact details.

7. Festival Rules:

- Displays important instructions for participants.

- Helps maintain discipline during the festival.

8. Registration Section:

- Provides a registration form for students.
- Collects name, email, college name, and event selection.
- Includes a submit button.

9. Footer Section:

- Displays copyright information.
- Shows the festival tagline.

5.Output

6. Conclusion

The TECHNOVIBE 2026 College Fest Website was successfully developed using HTML and CSS. This project provides a simple and attractive platform to display college festival information and event details.

Through this project, I learned how to create webpage structures using HTML and design attractive layouts using CSS. I also gained practical knowledge of navigation bars, event cards, tables, forms, buttons, hover effects, and responsive web design.

This project helped me improve my frontend web development skills and understand how to develop an informative and user-friendly website

Case-Study-3

1. Introduction

Serenity Wellness is a Yoga and Meditation Website developed using HTML and CSS. The main purpose of this website is to provide information about yoga, meditation, and healthy lifestyle practices in one place.

The website provides details about popular yoga poses, meditation techniques, instructors, weekly class schedules, membership plans, and wellness articles. It helps visitors explore different wellness activities and learn about maintaining a peaceful and healthy lifestyle.

The website is designed with a simple, attractive, and user-friendly interface using natural colours, images, cards, navigation links, and responsive layouts. HTML is used to create the structure, while CSS is used to improve the appearance and design of the website.

2. Explanation of the Website

The Serenity Wellness website contains the following sections:

1. Header Section:

- Displays the website name Serenity Wellness.
- Shows the tagline "Your journey to a peaceful mind and healthy life".
- Provides the identity of the website.

2. Navigation Bar:

- Contains links to Home, Yoga, Meditation, Instructors, Schedule, Membership, and Articles.
- Helps users easily navigate between different sections.

3. Home Section:

- Displays the welcome message "Find Your Inner Peace".
- Provides a short introduction about wellness.
- Includes an Explore Classes button.

4. Popular Yoga Poses:

- Displays different yoga poses with images.
- Includes Mountain Pose, Downward Dog, and Warrior Pose.
- Provides a short explanation of each pose.

5. Meditation Techniques:

- Displays different meditation methods.
- Includes Mindful Breathing, Body Scan, and Guided Meditation.
- Explains simple relaxation techniques.

6. Instructors Section:

- Displays instructor names and photographs.
- Provides their roles, such as Yoga Instructor, Meditation Coach, and Wellness Guide.

7. Weekly Class Schedule:

- Displays the weekly class timings and activities in a table.
- Helps visitors understand the available class schedules.

8. Membership Plans:

- Displays three membership plans: Basic, Premium, and Family.
- Provides sample prices and plan details.
- Includes Choose Plan buttons.

9. Wellness Articles:

- Displays articles about daily yoga, mindfulness, and creating a calm routine.
- Provides useful information about wellness practices.

10. Contact Section:

- Displays a message encouraging visitors to begin their wellness journey.
- Includes a Back to Top button.

11. Footer Section:

- Displays copyright information.
- Shows the tagline "Breathe • Move • Be Well".

3.HTML Code
